

PRAJAV KRISHNA S B

Cybersecurity Analyst

+91 9385298352 | ✉ prajavkrishnaofficial@gmail.com | 🔗 LinkedIn: prajavkrishna-linkedin | Nagercoil

Cybersecurity and Digital Forensics enthusiast with hands-on experience in SOC monitoring, log analysis, and security investigation using Linux, Wireshark, Splunk, and Python-based security tools, and cloud security fundamentals. Built security-focused projects including an AI-powered SOC dashboard and File Integrity Monitoring system. Passionate about DFIR, threat detection, and incident analysis.

TECHNICAL SKILLS

Security Tools:

- Wireshark
- Autopsy
- FTK Imager
- Burpsuite
- Sysmon
- Splunk
- EDR

Security Concepts:

- Threat Detection
- MITRE ATT&CK
- Network Traffic Analysis
- SIEM
- File Integrity Monitoring
- Windows Event Viewer
- TCP/IP analysis

Programming & OS:

- Linux
- Kali Linux
- Windows
- SQL
- Python Scripting
- Bash Scripting
- YARA

PROJECTS

SOC-DEADMAN — AI-Powered SOC Monitoring Dashboard

GitHub: (SOC-DEADMAN PROJECT)

- Developed an AI-powered SOC dashboard capable of monitoring and logging simulated security events in real time.
- Implemented detection workflows using Python, OpenCV, and YOLOv8 with automated evidence capture.
- Built a Flask-based backend with event logging and PostgreSQL/SQLite database integration.
- Simulated SOC analyst workflows including alert triage, incident tracking, confidence scoring, and event visualization.
- Tools Used: Linux, Python, Flask, PostgreSQL, GitHub, SIEM Concepts

FILE INTEGRITY MONITORING

GitHub: (FIM-TOOL PROJECT)

- Developed a Python-based File Integrity Monitoring (FIM) tool to detect unauthorized file modifications
- Implemented hashing mechanisms for file change detection and suspicious activity alerting.
- Maintained the integrity of event logs for monitoring and forensic analysis.
- Tools Used: Python, Linux, GitHub

HANDS-ON LABS

- Performed packet analysis and network traffic investigation using Wireshark.
- Investigated simulated phishing and brute-force attack scenarios in lab environments.
- Practiced log analysis and security monitoring using Splunk and SIEM concepts.
- Solved cybersecurity and DFIR challenges on TryHackMe and Hack The Box.

EDUCATION

Bachelor of Computer Applications (BCA)

Scott Christian College, Nagercoil | Aug 2022 – May 2025

CERTIFICATION

- CERTIFIED SOC ANALYST (CICSA) — RED TEAM HACKERS ACADEMY
- CERTIFIED INFRASTRUCTURE ANALYST — RED TEAM HACKERS ACADEMY
